AWARD 2019

Registration

The International Federation for the Roofing Trade IFD will also award this year the prizes of the IFD **AWARD 2019**.

There are AWARDS in the following four categories:

- **Pitched roofing**

This includes:

- roof coverings with large sized roof covering elements e.g. fibre-cement corrugated sheets
or
- roof coverings with small sized roof covering products e.g. roof clay tiles, roof concrete tiles, natural slate, fibre-cement roof sheets, bitumen shingles, wooden shingles, reed or thatch.

This does not with metal products as well as the load bearing structure e.g. roof framework from wood.

- **Flat roofing**

For this competition, we understand flat roofing as

- Roofs with waterproofing from bitumen-, plastic- or elastomeric-sheets or –membranes and liquid applied roof waterproofing.

Flat roofs must not be flat necessarily.

- **Metal roofing**

Metal roofs we understand for this competition as

- Roof covering on gentle sloped or pitched roofs from small or large sized metal roof products e.g. corrugated metal sheets, metal bands and metal sheets or panels on wooden structure, self-supporting small sized metal roof products or trapezoidal sheets as top layer resp. sandwich panels.

- **Facade/Wall cladding**

Facade includes the whole area of coverings and claddings of vertical outer walls with small sized or large sized products or elements, also with metal. Usually the products are back-ventilated, but also industrial constructions e.g. with sandwich panels are part of this.

Walls, curtain walls and facings e.g. from bricks are not in this category.

The prizes are awarded for specific initiatives and for solving specific challenges in the execution of a project.
